

FIXED CORNER DECK

SMART DECKS FROM VERSATILE RINGSCAFF®

NO STEPS OR TRIPPING EDGES,
SAFE WORKING WITH CORNER DECKS

Every scaffolder recognizes the problem with open corners in the decked scaffolding area. Often, corners are simply filled in by placing steel decks or wooden planks on the corner side. To mitigate this problem, a fixed corner deck by Scafom-rux mitigates this issue.

The Scafom-rux fixed corner deck brings the scaffolding deck area closer to the building. Without any steps or tripping edges, worksite safety is significantly increased. This deck is fabricated from hot-dip galvanised steel which greatly reduces the risk of fire hazard.

➤ FIXED CORNER DECKS EXTEND THE DECK ASSORTMENT!

"Filling In The Gaps" is a common business term also heard in the scaffolding industry. RINGSCAFF® Fixed Corner Decks lead to increased system usability and excellent levels of safety. Ease of installation and increased subsequent use means that RINGSCAFF® Fixed Corner Decks "fill in the gaps" as and when needed.

The fixed corner deck aligns perfectly with standard deck layouts. There's absolutely no interference. Two hooks on the deck and a solid wedge connection ensure high levels of rigidity and safety of every corner standard.

| Article Nr. | Description | Weight (kg/lbs) |
|-------------|--------------------------|-----------------|
| E04RS1296 | Fixed Corner Deck 0.73 m | 7.3/16.1 |

Innovation reflects the strong engineering traditions of Scafom-rux, a global leader of the worldwide scaffolding and shoring industry.
